TRIUMF Theory Group  
Postdoctoral Positions  

It is anticipated that there will be several Postdoctoral Research Associate positions available in the Theory Group at TRIUMF starting in September 2007. Candidates should have completed a Ph.D. degree within the past five years and should show evidence of or promise for the ability to carry out high quality research in some area of relevance to the TRIUMF program. This includes nuclear physics, nuclear astrophysics, particle phenomenology, and lattice QCD. An important qualification for final selection will be the way the candidate’s detailed interests and experience complement and balance the present theoretical effort at TRIUMF.

Duties consist of research, either independently or in collaboration with members of the Theory Group, which currently consists of five staff members, about seven research associates, and several long term visitors and students. Interaction with experimentalists using the TRIUMF facility is encouraged.

Appointments are initially for one year and are renewable for up to a total of two years. Salary depends on experience, usual university benefits apply, and travel to conferences is possible. Interested candidates should send a resume including a list of publications and have three letters of reference sent to:

Dr. Byron K. Jennings, Group Leader  
TRIUMF Theory Group  
TRIUMF  
4004 Wesbrook Mall  
Vancouver, B.C. Canada, V6T 2A3  

Review of applications will begin December 15, 2006 and continue until the positions are filled. We offer equal employment opportunities to qualified male and female applicants.
